

Company Profile

Established in **1995**, at **Ahmedabad (Gujarat, India)**, we, “**Vivek Engineering**”, have gained recognition as the leading **manufacturer** and **Supplier** of wide range of **Hydraulic Cylinders, Excavator Buckets, Boom & Dippers** etc. The offered products are manufactured by our skilled professionals using optimum quality raw material and latest technology in compliance with market quality standards under the guidance of our quality examiner.

These products are widely acknowledged among our clients due to their remarkable features such as elevated durability, sturdy construction, high strength, easy to install, etc. Our offered range is stringently tested on various quality parameters in order to deliver high quality range. Apart from this, offered products are available in various sizes and dimensions at industry leading prices.

We are backed with well constructed infrastructural unit that is well-equipped with sophisticated technology and machinery. This unit facilitates our adept team members to manufacture our complete assortment in bulk quantity at a very fast production rate. Moreover, we have segregated our infrastructure into many units such as procurement, designing, production, quality testing and warehousing & packaging. All these units are handled by our experts, who hold rich industrial experience and knowledge in their respective domain. Our skilled professionals work in close coordination in order to understand the specific need of our valuable clients. These products are meticulously tested on various parameters in compliance with set market norms. By working in close association, our skilled professionals enable us to fulfill the ever-changing requirement of clients in stipulated time frame. Also, we organize important training sessions for our team members in order to enhance their skills and knowledge.

Being a quality centric organization, we have been able to satisfy the various requirements of our valuable clients in the best possible manner. Our production team manufactures these products in conformity with the set market norms. Moreover, our quality examiner tests these products on well-defined parameters of quality using latest tools and devices to ensure best quality of products. Due to a client-centric organization, our main motive is to attain the utmost client satisfaction by offering them best quality range. Further, we supply our products in optimum quality packaging material to ensure safe transit of products at the clients' end. Apart from this, transparent dealings, our easy payment modes, client-centric approach, ethical business policies and competitive price range have enabled the organization to achieve immense success.

Our Team

We have hired a team of highly skilled professionals, who have wide industry experience and knowledge in their respective domain. Our offered products are manufactured by these professionals by using optimum quality raw material and innovative technology. Our professionals are fully dedicated and competent towards meeting the exact requirements of clients within the stipulated time frame. In order to enhance the skills of our employees, we also organize regular seminars and workshops in our premises.

Why Us?

We have marked a distinct position in the market by providing a precisely engineered range of products.

We are a preferred choice of our clients due to the following factors:

- State-of-the-art infrastructure
- Our manufacturing units with latest machines
- A dedicated, experienced and knowledgeable workforce
- Unmatched quality products
- Cost effective prices

- ❖ Fly Ash Bricks Making Machine
- ❖ Grab Bucket And Bucket
- ❖ Hydraulic Cylinder
- ❖ Tipper Cylinder
- ❖ Telescopic Cylinder
- ❖ All Type Ind. Cylinder
- ❖ Earthmoving M/C Cylinder

Fly Ash Bricks Making Machine

Vivek Engineering has attained acknowledgment as a thriving organization for providing nonpareil quality of the **fly ash bricks making machine**, and as this offered machine performs an entire operation automatically, is also reckoned as the **fully automatic fly ash bricks making machine**. This **fly ash bricks making machine** is specifically designed to convert the mixture of ash, lime, gypsum, sand and water into the high strength **fly ash bricks** by applying high pressure load, in which higher strength of the **fly ash bricks** is also procured by holding the pressure at specific time. Bricks manufactured by this machine have high compressive strength with low density, light weight, and low water absorption capacity, unlikely to burn clay bricks, and thereby highly demanding in building construction activities.

Our goal is to provide a range of qualitative fully automatic fly ash bricks making machine that delights the customer through surpassing their expectation in regard to quality, and in order to procure such an outstanding quality of the fly ash bricks making machine, a well trained and ingenious workforce of the Vivek Engineering works zealously by paying utmost attention to the quality measurements. Further, our QA team conducts regular quality tests on the products based on the industry specific parameters incorporating strength and durability too. The offered fly ash bricks making machine guarantees, high efficiency, enhanced productivity, rugged construction, longer shelf life, highly resistant to corrosion & abrasion traits, and is acclaimed to take up heavy cyclic loads too.

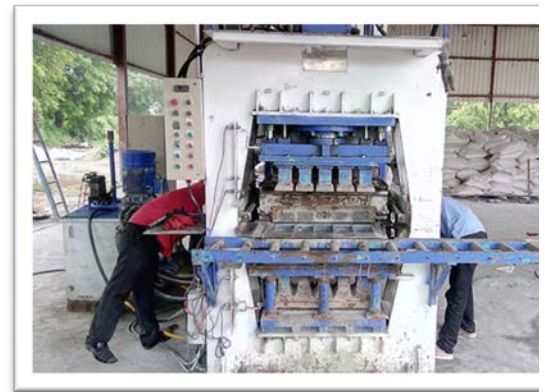

This fly ash bricks making machine is available in different specifications, as well as customized specification at the most competitive rates in the market.

Salient features Of Fly Ash Bricks Making Machine:

- ❖ The machine is acknowledged for its high speed performance
- ❖ Manufacture bricks of uniform dimension
- ❖ Require less maintenance for enhanced service
- ❖ Excellent resistance to corrosion and abrasion

Why Us?

- ❖ We have wide field experience of hydraulic and fabrication since 1995.
- ❖ Our machines are manufactured in our in-house fully assembled facility.

Grab Bucket And Bucket

We offer **grab bucket** at competitive price of best quality available in the market.

Size :- 500mm – 1 meter

Bucket

We offer bucket at competitive price of best quality available in the market.

Size :- 0.6 cu.m to 3cu.m

Hydraulic Cylinder

Technical Specifications

- ❖ 70 mm bore to 300 mm bore
- ❖ length up to 3000 mm
- ❖ as per customer's req.

Applications:- Used in Ashok layland, Tata, AMW, Volvo

Tipper Cylinder

Technical Specifications

SR No	Description
1	FE 129-3-03640
2	FE 129-3-03700
3	FE 149-4-04620
4	FE 191-5-06180

Applications: Used in Dumper Cylinder in Ashok layland, Tata, AMW, Volvo,

Telescopic Hydraulic Cylinder

Technical Specifications

- ❖ up to 5 stage
- ❖ Stroke 6000 mm
- ❖ as per customer's req.

Applications: Used in Dumper Cylinder in Ashok layland, Tata, AMW, Volvo,

All Type Ind. Cylinder

Technical Specifications

- ❖ 70 mm to 300 mm
- ❖ Stroke length 100 mm to 3000 mm
- ❖ as per customer's req.

Applications: Used in Plastic Molding, furnace, material handling

Earthmoving M/C Cylinder

Technical Specifications

- ❖ Replacement cylinder for earthmoving machineries like Tata Hitachi, L&T komatsu, Samsung, Daewoo, Hyundai, Volvo, Cater Pillar
- ❖ Tata Hitachi : Ex70 to Ex450 excavator or Equivalent

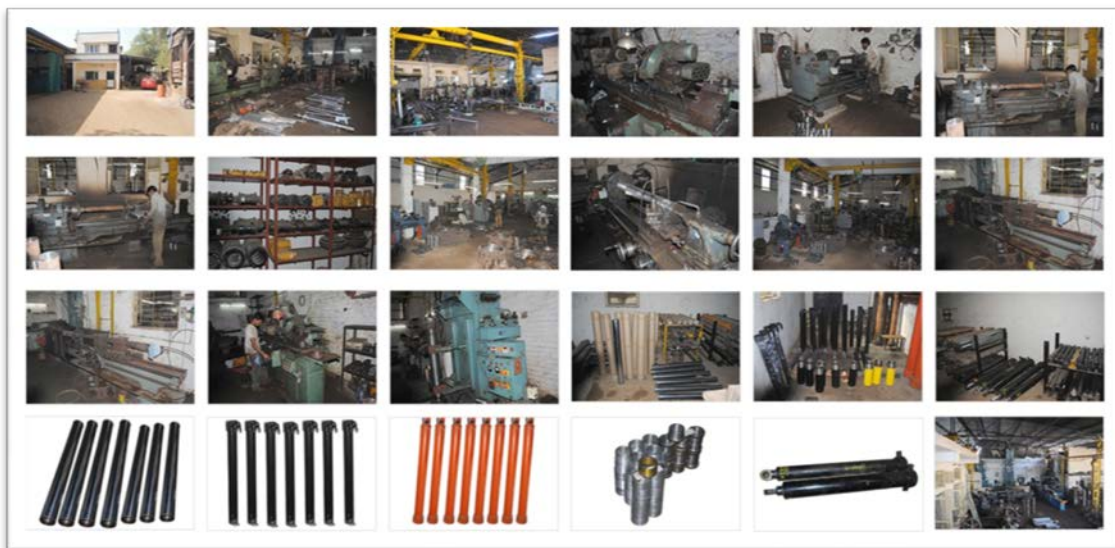

Applications: Used in Ashok layland, Tata, AMW, Volvo

Machinery & Workshop

Facilities as Below :

- ❖ Machine tools -11 nos lathe capacity 41/2 to 16 fool long swing up to 1500 dia
- ❖ 2nos cyl. Grinding m/c 1 mt&2200mm
- ❖ 2nos hydraulic honing m/c dia50mm to 500mm &length 3400
- ❖ Welding m/c 4 nos 2nosrectifier &1nos mig welding & 1nos transformer welding
- ❖ Work shop area 4500 sq mt office area 200 sq mt
- ❖ Plating work shop area 2500 sq mt
